Project Name: Plugging into the Future: An Exploration of Electricity Consumption Patterns

Empathy Map Canvas

User	Energy Analyst / Government Official / Researcher / Utility Manager
SAYS	'I need reliable electricity consumption data.' 'I want quick comparisons across states and years.'
THINKS	Needs accurate insights for planning, forecasting, and decision-making. Wants a simple interface instead of complex spreadsheets.
DOES	Collects electricity data, compares regions, prepares reports, and monitors consumption trends.
FEELS	Frustrated with scattered data, time-consuming reports, and difficulty identifying patterns.
PAINS	Raw data is difficult to interpret. Limited interactive visualizations. Time-consuming manual analysis.
GAINS	Interactive dashboard, easy filtering, state-wise and region-wise comparison, faster decision-making.

Summary

The empathy map shows that users require an easy-to-use platform to explore electricity consumption patterns. By providing interactive maps, charts, filters, and year-wise comparisons, the proposed Tableau dashboard helps users analyze data efficiently and make informed energy planning decisions.
